EXPERIENCE

Chaldal Engineering

June 2024 – Present

Software Engineer

Dhaka, Bangladesh

- Delivered full-stack features using **C#, F#, .NET Core, React Native**, and Azure DevOps CI/CD.
- Built secure multi-account bKash wallet binding system to support 1000+ daily one-tap payment transactions.
- Developed core services of **ChaldalPay**, including QR payments, e-KYC verification, dispute flows, admin features like dispute tools, bulk QR generation, wallet control, etc.
- Integrated **Amazon Rekognition** and **DeepFace** for face verification, and **Election Commission API** for national ID verification.
- Contributed to passing the **Bangladesh Bank audit** for the MFS app; resolved VAPT issues (domain whitelisting, blocking man-in-middle attack) for PCI-DSS compliance.
- Building a new **Payment Gateway** under ChaldalPay with gRPC services and protobuf contracts for merchant payments.

Competitive Programming Contests

Problem Setter, Judge

- Been judge and problem setter for international and national contests including Codechef, IUT IUPC 2024, IJUC IUPC 2023, NGPC 2021, ALNGPC 2021, Tough Duo April 2022, Criterion 2022 Round 17.

PROJECTS

Porua AI | Python, FastAPI, SQLAlchemy 2 (async), Alembic, PostgreSQL, Gemini, Pytest, Docker

- Backend for an AI study tutor. A student opens a room per topic and uploads class notes as .pdf, .docx or .pptx, which the tutor answers from and cites.
- The model can request tools but never runs anything itself: calls go through a fixed registry with **Pydantic**-validated arguments, and no tool takes a student id, so it cannot reach another student's data.
- Every answer is checked before the student sees it, and a rejected one goes back to the model with the exact failure named. Attempts are stored as rows, failures included, so any answer traces back to the prompt version and retries behind it.
- The maths tool checks expressions node by node against a syntax-tree allow-list rather than calling eval, which is escapable from an integer literal, and **SymPy** verifies worked solutions line by line.

TECHNICAL SKILLS

Languages: Python, F#, C#, TypeScript, C++

Frameworks: FastAPI, ASP.NET Core, NestJS, React Native

Tools: Git, Claude Code, GPT-GEMINI API, MSSQL, PostgreSQL, SQLAlchemy, Prisma, Redis, Docker, Azure, gRPC

ACHIEVEMENTS

- Two times participated in **ICPC Asia West Continent Final 2022 and 2023**
- **9th** in ICPC Dhaka Regional 2023
- Codeforces Max Rating: 1661 (Expert)

EDUCATION

Rajshahi University of Engineering and Technology

December 2024

B.Sc. in Electrical and Computer Engineering

Rajshahi, Bangladesh

VOLUNTEERING

Class Representative

February 2019 – December 2024

Department of Electrical and Computer Engineering, 18 Series

RUET

General Secretary

June 2023 – May 2024

Astronomy and Science Society of RUET (ASSR)

RUET

- Organized several national and regional events, including Science Olympiads, project showcases, and Rubik's Cube competitions.
