EXPERIENCE

Chaldal Engineering

June 2024 – Present

Software Engineer

Dhaka, Bangladesh

- Developed backend services for the **ChaldalPay** MFS platform in **F#, C#, .NET Core, and MSSQL**, with React Native clients and Azure DevOps CI/CD pipelines.
- Built core ChaldalPay services like QR payments, dispute resolution, wallet operations, bulk QR generation, and e-KYC, with each flow driven by a **state machine** (e.g. disputes: *opened, under-review, resolved/rejected*) so transitions remain logged and replayable for audit.
- Integrated multiple external systems through a shared HTTP client with retry and timeout handling: **Bangladesh EC NID** for identity verification, **CyberSource** for card payments, and **Amazon Rekognition + DeepFace** for facial matching.
- Designed the schema and implemented **multi-account bKash binding** across Chaldal and Cookups: each user retains a full bind/unbind history with exactly one account active at a time, supporting 1000+ daily transactions.
- Developing a merchant **Payment Gateway** under ChaldalPay using **gRPC and protobuf** contracts between services.
- Contributed to passing the **Bangladesh Bank audit** for the MFS app; resolved **VAPT** findings (domain whitelisting, MITM hardening) toward **PCI-DSS** compliance.

Competitive Programming Contests

Problem Setter, Judge

- Been judge and problem setter for international and national contests including Codechef, IUT IUPC 2024, IIUC IUPC 2023, NGPC 2021, ALNGPC 2021, Tough Duo April 2022, Criterion 2022 Round 17.

PROJECT

Escape AI | NestJS, React Native, PostgreSQL, Prisma, OpenAI, Gemini, Google Maps, BullMQ, Redis

- A travel planner that generates day-by-day itineraries with real places, photos, and travel times from a single trip request.
- Two-step pipeline: **AI** returns the itinerary (place names and timings) as JSON against a fixed schema, then the backend resolves each place through **Google Places** and retrieves travel times via **Google Routes**; `place_id` results are cached in **PostgreSQL** to avoid redundant API calls on repeat queries.
- JWT + OAuth** authentication, with subscription tiers and per-user rate limits and quotas enforced on the generation endpoint.

TECHNICAL SKILLS

Languages: F#, C#, TypeScript, C++

Frameworks: ASP.NET Core, NestJS, React Native

Tools: Git, Claude Code, OpenAI and Gemini API, MSSQL, PostgreSQL, Prisma, Redis, Docker, Azure DevOps, gRPC

ACHIEVEMENTS

- Two times participated in **ICPC Asia West Continent Final 2022 and 2023**
- 9th** in ICPC Dhaka Regional 2023 and **20th** in NCPC 2023
- Codeforces Max Rating: 1661 (Expert)

EDUCATION

Rajshahi University of Engineering and Technology

December 2024

B.Sc. in Electrical and Computer Engineering

Rajshahi, Bangladesh

VOLUNTEERING

Class Representative

February 2019 – December 2024

Department of Electrical and Computer Engineering, 18 Series

RUET

General Secretary

June 2023 – May 2024

Astronomy and Science Society of RUET (ASSR)

RUET

- Organized several national and regional events, including Science Olympiads, project showcases, and Rubik's Cube competitions.
